

Philip Mark Nielsen

Profile

Ambitious and curious software developer with experience working across the full stack using **C#, .NET, SQL, React, TypeScript**, and **Next.js**. I enjoy building features end-to-end, from clarifying requirements to delivering reliable, user-focused solutions in production. I thrive in environments where quality, collaboration and continuous improvement matter, and where customer needs are translated into clear technical outcomes.

My portfolio website is built with **React, Next.js, JavaScript**, and **Tailwind**, including **API** integrations.

I work confidently in agile environments using **SCRUM** and **Extreme Programming (XP)**, where frequent feedback, clear communication and iterative improvement drive better solutions.

I learn fast, communicate clearly and contribute positively to the team around me. I like turning complex challenges into solutions that feel simple for users and meaningful for customers.

Technical Skills

Portfolio:
<https://portfolio.nuggit.dk/>

Programming Languages:
C#, Kotlin, Python, SQL, Vue.js, React, Next.js, HTML, CSS, Bootstrap,

Frameworks & Technologies:
.NET (inkl. Razor Pages & Blazor), ASP.NET, Entity Framework, Syncfusion, Jetpack Compose, Axios, JSON, REST API, Selenium, UnitTest

Tools & Environments:

Work Experience

Application Management Consultant, Fellowmind
Roskilde

November 2025 - Marts 2026

- Development and design of monitoring solutions for clients using the Microsoft Power Platform, including SharePoint, Power Automate, Power Apps, App Services, Functions, DevOps, and Dataverse.
- Maintenance and operation of client systems built with .NET and C#.
- Consultant and responsible lead for various clients.
- Estimation, development, and implementation of client requirements and solutions.

Full-stack Developer, internsship, Beezy365
Køge

January 2025 - March 2025

- Developed a time registration module for the ChannelCRM system using C#, .NET, and Blazor with Syncfusion, including requirements clarification with the consultant to ensure usability
- Integrated AI features (RAG and CAG) into ChannelCRM as part of the main project
- Designed system architecture with UML diagrams and worked on SQL database management
- Built API controllers handling CRUD operations, ensuring efficient data exchange between the Blazor frontend and the database within an agile development team

Production Technician, Biometric Solutions
Skovlunde

February 2022 - February 2024

- Setup and installation of hardware, components, software, and firmware
- Testing and quality assurance of finished products
- Troubleshooting and fixing technical equipment issues

IT Assistant, Herlev Ungdomsskole
Herlev

September 2020 - September 2021

- Supported daily IT operations for colleagues and students (apps, software, issues)
- Optimized digital media setups in school facilities
- Ensured secure exams through IT equipment preparation and support

After-School Educator, SFO Skovvang
Glostrup

August 2016 - February 2020

- Developed children's digital and social skills through media education

Visual Studio 2022, VS Code, SSMS, Git, Docker, Postman, Filezilla

System Development:
SCRUM, Extreme Programming

Cloud & DevOps:
Microsoft Azure, Azure DevOps, GitHub Actions, CI/CD

Certificates

Linkedin: Learning Next.js
Linkedin: React Essential Training
Linkedin: Learning C#
Linkedin: SQL Essential Training
Linkedin: CSS Essential Training (2019)
Linkedin: HTML Essential Training

Soft Skills

- Collaborative and culturally aware
- Clear and adaptable communicator
- Strong interpersonal skills – able to explain complex topics simply
- Calm, solution-focused decision-maker
- Reliable and loyal team player
- Skilled in troubleshooting and problem-solving

My Hobbies

- Gaming and hardware
- Soldering and electronics projects
- Outdoor activities and nature experiences
- Northern Lights photography
- Crafts and DIY projects
- Spending time with my wife and children

Other Info

- Clean criminal record (available upon request)
- Driver's license: Category B

My Projects

BeerBasement,	December 2024 - January 2025
Developed an Android beer app in Kotlin using Jetpack Compose. Users can add and manage a personal beer collection, take photos, and recognize beers using Google ML Kit, Google Cloud Vision API, and a TensorFlow-based model. Firebase is used for authentication.	
https://github.com/Nuggitt/BeerBasement	
HeatWaves,	April 2024 - June 2024
Created a temperature measurement system using C#, REST API, SQL, Python and Vue.js. Collected data from a Raspberry Pi (indoor) and a third-party API (outdoor), stored it in a database, and visualized it on an HTML page. Automated testing was implemented with Selenium.	
https://github.com/Nuggitt/HeatWaves https://github.com/Nuggitt/HtmlHeatWave https://github.com/Nuggitt/Temperatur-M-ler-Eksamen	
Raffle Ticket Sales System for FDF,	October 2023 - December 2023
Built backend logic in C# .NET Razor Pages using Entity Framework Core and ADO.NET. Integrated secure login and user authentication.	
https://github.com/Nuggitt/LodSalgsSystemFDF	
Gaming Computer Store,	October 2022 - December 2022
Developed frontend and backend using C# .NET Razor Pages focusing on user experience, model binding, backend integration, and secure login/authentication.	
https://github.com/Nuggitt/SharkGaming	

Education

Computer Science, Zealand Roskilde Roskilde	September 2022 - June 2025
• Practical experience with C#, .NET, SQL, Python, Kotlin (Jetpack Compose), HTML, CSS, Vue.js, and JSON • Developed CRUD operations using C# (.NET Razor Pages) and Vue.js with REST API integration • Collaborated in team projects using Scrum and Extreme Programming (XP) • Internship and thesis project at ChannelCRM: developed a time registration model and integrated AI features into a CRM system using RAG and CAG technologies • Participated in several major development projects	
Higher Preparatory Course, Køge Business College & DTU Køge	October 2020 - July 2021
• Math B, Math A, and Physics B	
Professional Bachelor of Education, UCC Frøbel Copenhagen	February 2013 - June 2016
